

Telko — Representing leading global polymer producers

Expertise and solutions designed for your industry's unique needs

The right choice of raw materials enhances the quality and commercial potential of your products. Telko's experts provide advanced support in product development, the use of plastic, and help you find the most suitable plastic raw materials for the most innovative material solutions based on your needs.

WHY CHOOSE TELKO?

- We supply a wide range of high quality engineering plastics used for various applications in the medical, automotive, electrical, electronics, household, and construction sectors.
- We provide reliable technical support for our customers in design and material selection.
- We support our customers in troubleshooting and process improvements.
- Our own warehouses ensure that products can be made available just-on-time.

Uninterrupted supply and uncompromised quality—

A wide range of polymers, backed by an extensive network ensuring reliable solutions for even the most demanding applications.

Direct access to the broadest range of polymers

Material type	Polymers and Applications
Engineering Plastics	
Thermoplastic Elastomers	TPE, TPU, TPV, TPC
Combine the elastic properties of rubber with the processing ease of plastics, making them versatile for a wide range of applications. They are characterized by flexibility, durability, and recyclability, while offering excellent resistance to chemicals and weathering.	
Technical plastics	POM, PA, PC/ABS, PC compounds
Advanced polymers engineered for demanding applications, offering exceptional mechanical strength, dimensional stability, and resistance to heat, chemicals, and wear.	
General Purpose Plastics	ABS, PC, PMMA, PS, PVC
Versatile materials widely used in everyday products, offering a balance of durability, aesthetics, and ease of processing.	
High Performance Polyolefin Plastics	
Films & Coatings Rigid Packaging	HDPE, LDPE, LLDPE, mLLDPE, PPC, PPH, PPR, POP, POE
Produce lightweight, flexible, highest quality film and rigid packaging with our range of polyethylene (PE) and polypropylene (PP) resins, modifiers, and performance polymers.	
Appliances & Technical Parts	Choose from a wide array of raw materials for manufacturing appliances and technical parts used in processes such as injection moulding. Achieve the desired characteristics of your plastic formulations with our broad range of carriers, reactor-powder carriers and wire and cable compounds.
Compounding & Masterbatch Production	
Medical & Healthcare	Know for certain that your raw materials meet the highest standards of safety. We supply medical and healthcare polypropylene and polyethylene that correspond both EU and US pharmacopoeia.

Sustainable plastics

Telko's **SmartFuture™** portfolio offers sustainable plastic solutions, prioritizing both business performance and environmental responsibility. Our portfolio includes recycled plastics and diverse bioplastics aiming to support customers' shift toward a circular economy. We enable companies to meet industry and consumer sustainability demands without compromising on quality. We want to enhance sustainability across manufacturing and supply chains.
